1: roderick@RsLinux: ~  
15823 Section 5. General Information About Project Gutenberg™ electronic works  
15824  
15825 Professor Michael S. Hart was the originator of the Project  
15826 Gutenberg™ concept of a library of electronic works that could be  
15827 freely shared with anyone. For forty years, he produced and  
15828 distributed Project Gutenberg™ eBooks with only a loose network of  
15829 volunteer support.  
15830  
15831 Project Gutenberg™ eBooks are often created from several printed  
15832 editions, all of which are confirmed as not protected by copyright in  
15833 the U.S. unless a copyright notice is included. Thus, we do not  
15834 necessarily keep eBooks in compliance with any particular paper  
15835 edition.  
15836  
15837 Most people start at our website which has the main PG search  
15838 facility: www.gutenberg.org.  
15839  
15840 This website includes information about Project Gutenberg™,  
15841 including how to make donations to the Project Gutenberg Literary  
15842 Archive Foundation, how to help produce our new eBooks, and how to  
15843 subscribe to our email newsletter to hear about new eBooks.  
15844  
15845  
roderick@RsLinux:~$ |
```

```
1153 cat /etc/passwd  
1154 tac /etc/passwd  
1155 cat -nE /etc/passwd  
1156 head -5 /etc/passwd  
1157 tail -5 /etc/passwd

Question 2

1-4

A terminal window titled 'Tilix: roderick@RsLinux: ~' with standard window controls. The terminal shows a series of commands and their outputs for analyzing an 'access.log' file. The commands include 'wc -l', 'head -n 1', 'head -n 1 | cut -d' ' -f5', 'tail -n 1', and 'head -n 15'. The output shows file statistics and log entries with timestamps, usernames, and actions (e.g., /upload, /dashboard, /settings, /logout, /download, /404, /admin, /reset, /login, /settings).

A terminal window titled 'Tilix: roderick@RsLinux: ~' with a dark theme. The background of the terminal is a grayscale anime-style illustration of a character with spiky hair, wearing a hoodie with a large 'X' on the back, and holding a sword. The terminal shows three commands being executed: 'sort -k5 access.log > sorted_access_log_by_uname.log', 'sort -k6 access.log > sorted_access_log_by_endpoint.log', and 'cut -d' ' -f5,6,7 access.log'. Below the commands, a list of log entries is displayed, alternating between 'DENIED' and 'SUCCESS'.
