

# Deliverable 3

## Project Repository

<https://github.com/roderickCis04/porfolio>

## Main page of navigation

The screenshot shows a web browser window with the URL <https://192.168.1.101/porfolio/>. The page title is "Dinosaurs Website". The content includes a welcome message, a list of available dinosaurs (Tyrannosaurus Rex, Triceratops, Spinosaurus), information about the project being hosted on a Debian Linux web server, and a navigation section. The browser interface includes standard controls like back, forward, and search.

Welcome to the **Dinosaurs Information Site**.  
This website provides educational content about some of the most well-known dinosaurs that lived during the Mesozoic Era.

Available Dinosaurs

- Tyrannosaurus Rex
- Triceratops
- Spinosaurus

About This Project

This website is hosted on a **Debian Linux web server** and deployed using a GitHub repository. The content is written in **Markdown** and served as static web pages.

Navigation

- Tyrannosaurus Rex
- Triceratops
- Spinosaurus

## T-Rex

## Tyrannosaurus Rex (T-Rex)

The **Tyrannosaurus Rex**, commonly known as **T-Rex**, was one of the largest land carnivores to ever exist.

### General Information

- **Period:** Late Cretaceous
- **Diet:** Carnivore
- **Length:** Up to 40 feet
- **Weight:** Up to 9 tons
- **Location:** North America

### Physical Characteristics

- Massive skull with powerful jaws
- Sharp, serrated teeth
- Strong hind legs
- Very small front arms

### Diet

The T-Rex was a **meat-eater** and likely hunted large herbivores. Some scientists believe it may have also scavenged when possible.

### Quick Facts Table

Feature	Description
Teeth	Up to 12 inches long
Speed	Up to 20 mph
Bite Force	One of the strongest ever recorded

## Spinosaurus

## Spinosaurus

The **Spinosaurus** is considered the **largest carnivorous dinosaur** ever discovered and was adapted for a semi-aquatic lifestyle.

### General Information

- **Period:** Mid-Cretaceous
- **Diet:** Carnivore (mainly fish)
- **Length:** Up to 50 feet
- **Weight:** Up to 20 tons
- **Location:** North Africa

### Unique Features

- Large sail on its back
- Long, crocodile-like snout
- Conical teeth for catching fish
- Strong forearms

### Diet

Spinosaurus primarily ate:

- Fish
- Aquatic animals
- Possibly small dinosaurs

### Quick Facts Table

Feature	Description
Sail	Possibly for display or temperature regulation

## Triceratops

## 🦖 Triceratops

The **Triceratops** was a large, plant-eating dinosaur known for its three horns and protective frill.

### 🧠 General Information

- **Period:** Late Cretaceous
- **Diet:** Herbivore
- **Length:** Up to 30 feet
- **Weight:** Up to 12 tons
- **Location:** North America

### ✍ Physical Characteristics

- Three facial horns
- Large bony frill
- Thick, strong body
- Beak-like mouth for eating plants

### 🌿 Diet

Triceratops fed on:

- Low-growing plants
- Ferns
- Shrubs

### 📊 Quick Facts Table

Feature	Description
Horns	Used for defense
Frill	Protected the neck
